## THE LIFE SILIFFE PROJECT

The management of cross-border water bodies: comparing experiences

PUBLIC CONFERENCE

### The management of cross-border water bodies: comparing experiences

Friday 16<sup>th</sup> November 9.00 a.m.  
Cinema-Theater of Tolmin

The **Life SilIFFe** Project deals with the protection of the river Sile, the management of the river to guarantee the ecological functionality, fish restocking and the control of alien fish species.

The latter represent a danger for the typical species of our waters due to their extreme adaptability and resistance to environmental conditions, causing their decadence or even disappearance.

At the conference there will be speakers from various Life projects, from Italy and Slovenia.
